

## **Statement on Nuclear Disarmament by Ambassador Jayant Prasad Permanent Representative of India to the Conference on Disarmament at Conference on Disarmament, Geneva**

13/02/2007

Mr. President,

First, allow me to say that we are most happy to see you in the chair. Over the past week, in accordance with the organisational framework for the first part of the 2007 Session of the Conference on Disarmament, we have undertaken useful discussions on agenda items 1 and 2, both in the plenary held on 6th February and, thereafter, in six informal meetings. In this connection, I should like to express my delegation's appreciation for the initiative taken by the collective presidencies of the Conference for this year. In particular, we would like to compliment Ambassador MTSALI, as the first and incumbent President. The three distinguished Coordinators who have presided over the informal meetings on agenda items 1, 2 and 3, Ambassador STROMMEN, Ambassador TREZZA, and Ambassador MEYER also deserve our commendation for conducting the respective proceedings in an exemplary way, which is a good augury for the work of the Conference this year.

2. The discussions last week have reflected the resolve of UN Member States, contained in the final document of the first special session of the General Assembly devoted to disarmament and the UN Millennium Declaration, that nuclear disarmament is the most critical issue on the global disarmament agenda and that our ultimate goal is the complete elimination of nuclear weapons.

3. While maintaining a credible minimum nuclear deterrent, India continues to be committed to the goal of nuclear weapon free world, through global, verifiable and non-discriminatory nuclear disarmament. India's responsible nuclear doctrine is based on no first use and non-use of nuclear weapons against non-nuclear weapons States. The doctrine also reaffirms India's readiness to join multilateral negotiations for the reduction and elimination of nuclear weapons. India has continued to observe a moratorium on nuclear explosive tests. We are ready to participate in negotiations, in the Conference, on a non-discriminatory, multilateral and internationally and effectively verifiable treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices.

4. During the course of the informal discussions, we have spelt out India's specific proposals to build a consensus that strengthens the ability of the international community to move towards the goal of nuclear disarmament. The proposals presented have already been reflected in the non-paper on agenda item 1, compiled by Ambassador Strommen, that lists and clusters all concrete proposals for substantive issues that require more focussed attention during the second part of the annual session, with a view to commencement of negotiations.

5. In order to facilitate further consideration of practical steps for the progressive and systematic efforts to attain the cessation of the nuclear arms race and nuclear disarmament, and the prevention of nuclear war, I am separately requesting the Conference secretariat to circulate to the members of the Conference the text of India's working paper on nuclear disarmament presented on 6th October 2006 at the First Committee of the General Assembly at its 61st Session. This will facilitate the further discussions on agenda items 1 and 2 in the forthcoming meetings of the Conference.

6. We have gained from the format of the discussions, which have been held mostly in an informal setting. This has allowed for a freer exchange of ideas, besides providing greater clarity on the agenda issues that lie before us. India will remain engaged, together with

other delegations, in seeking ways to begin substantive work on all principal issues on the agenda of the Conference in a manner that takes into account the concerns and priorities of its constituents and secures their support. We are hopeful that the recommendations and proposals presented by the Member States and our further deliberations will contribute to an agreement on the programme of work of the Conference.

I thank you, Mr. President.

### **Annex: A Working Paper by India on Nuclear Disarmament**

The international community has long recognised that nuclear weapons pose the greatest danger to humankind and therefore, it is essential for it to take urgent steps towards realisation of the goal of their complete elimination. The UN General Assembly, in its very first resolution, Resolution 1(I) of 1946, adopted unanimously, sought the elimination, from national armaments, of atomic weapons and all other major weapons adaptable to mass destruction and to use of atomic energy only for peaceful purposes, a goal that has been reaffirmed by the General Assembly on several occasions thereafter.

2. The Final Document of the First Special Session of the General Assembly devoted to Disarmament (SSOD-I), the only document on nuclear disarmament adopted by consensus by all member States, affirmed and accorded the highest priority to the goal of nuclear disarmament and outlined concrete steps to achieve that objective. It pointed out that the achievement of nuclear disarmament would require urgent negotiation of agreements, at appropriate stages, and with adequate measures of verification satisfactory to the States concerned, for (i) the cessation of the qualitative improvement and development of nuclear weapon systems; (ii) the cessation of production of all types of nuclear weapons and their means of delivery and of the production of fissionable material for weapon purposes; and (iii) a comprehensive, phased programme with agreed timeframes, whenever possible, for progressive and balanced reduction of stockpiles of nuclear weapons and their means of delivery, leading to their ultimate and complete elimination at the earliest possible time. It emphasized that in the task of achieving the goals of nuclear disarmament, all nuclear weapon States, in particular those among them that possess the most important nuclear arsenals, bear a special responsibility. It also emphasized that the process of nuclear disarmament should be carried out in such a way and requires measures to ensure that the security of all States is guaranteed at progressively lower levels of nuclear armaments. The principles and objectives, which were agreed by all, remain of continuing relevance and need to be reaffirmed by the international community.

3. The International Court of Justice (ICJ) concluded in 1996 that: "there exists an obligation to pursue in good faith and bring to a conclusion negotiations leading to nuclear disarmament in all its aspects under strict and effective international control." The UN Millennium Declaration reiterated the commitment of the Member States of the United Nations to strive for the elimination of weapons of mass destruction, in particular nuclear weapons, and to keep all options open for achieving this aim. Various proposals for nuclear disarmament have since been considered, including in a number of studies ranging from the Canberra Commission to the more recent WMD Commission. The Pugwash Movement and the NGO Community have also made valuable contributions to the nuclear disarmament discourse.

4. The Non-aligned Movement, described as the largest peace movement in history, has always accorded the highest priority to nuclear disarmament. The XIV Havana NAM Summit reaffirmed the Movement's principled positions on nuclear disarmament and emphasized the necessity to start negotiations on a phased programme for the complete elimination of nuclear weapons with a specified framework of time, including a Nuclear Weapons Convention.

5. The international community is far from achieving the objective of the total elimination of nuclear weapons, though there has been some progress in this regard. In particular the Russian Federation and the United States have taken steps to reduce their nuclear weapons stockpiles, and India welcomes such efforts. Notwithstanding these reductions the global threat posed by nuclear weapons has not subsided. In recent years another dimension has been added by the possibility that terrorists and other non-State actors may acquire and use weapons of mass destruction, including nuclear weapons and so-called "dirty-bombs".

6. Despite the end of the cold war, the international security situation is still characterised by lack of trust and political will amongst states to make progress towards the complete elimination of nuclear weapons. The non-nuclear-weapon States have serious concerns about the commitment of nuclear-weapon States to nuclear disarmament. The absence of any reference whatsoever to disarmament and non-proliferation in the 2005 World Summit Outcome underscored this fact. The Final Document of SSOD-I enshrined the essential principle of mutually reinforcing linkage between disarmament and non-proliferation. States that have voluntarily undertaken disarmament and non-proliferation obligations under respective treaties must implement them fully and faithfully.

7. Nuclear disarmament and nuclear non-proliferation are mutually reinforcing processes. Effective, credible and comprehensive system of export controls, which at the same time do not hinder legitimate applications of science and technology for peaceful and developmental purposes, could be building blocks of a move towards universally acceptable non-discriminatory norms and effective international non-proliferation arrangements. Non-proliferation policies must also be forward looking, so as to allow for the expansion of international cooperation in the peaceful uses of nuclear energy for countries desirous of increasing the share of nuclear energy as a non-polluting energy source, in a manner that is safe, secure and proliferation resistant.

8. International efforts in nuclear disarmament would yield tangible results when they are backed by an international consensus. The Conference on Disarmament is the sole multilateral negotiating body on disarmament. The Disarmament Commission is the universal deliberative forum. The UN Charter endows the General Assembly with a responsibility on disarmament matters. The General Assembly must explore the convening of the Fourth Special Session on Disarmament, subject to consensus on its objectives and agenda. These remain the best fora to enable the emergence of a consensus and to make effective contribution to the goal of nuclear disarmament and the complete elimination of nuclear weapons worldwide.

9. India has played an active role in the international community's endeavours towards nuclear disarmament. India was the first to call for a ban on nuclear testing in 1954 and a non-discriminatory treaty on non-proliferation of nuclear weapons, as distinct from non-dissemination, in 1965. India's proposition on non-proliferation was predicated on the principle that the progressive steps towards elimination of weapons of mass destruction must be based on a balance of obligations between those who possess such weapons and those who do not. In 1978, India proposed negotiation for an international convention that would prohibit the use or threat of use of nuclear weapons. In 1982, India called for a 'nuclear freeze'- a prohibition on production of fissile materials for weapons, on production of nuclear weapons and related delivery systems.

10. In 1988, India presented the Rajiv Gandhi Action Plan to the General Assembly that provided a holistic framework seeking negotiations for a time-bound commitment for the complete elimination of nuclear weapons to usher in a world free of nuclear weapons and rooted in non-violence. This Action Plan was by far the most comprehensive initiative on nuclear disarmament, covering issues ranging from nuclear testing, fissile material for nuclear weapons to a time bound elimination of stockpiles. India, together with 27 other members of the Group of 21, in August 1996, presented to the Conference on Disarmament

a Programme of Action, as contained in document CD/1419, for the elimination of nuclear weapons, with a specified time frame. This was further endorsed by the Group of 21 in documents CD/1570 and CD/1571. 11. So long as the States that possess nuclear weapons continue to believe that nuclear weapons constitute a critical element of their security strategy, the goal of the complete elimination of nuclear weapons will remain elusive and distant. Therefore, reducing the salience of nuclear weapons in strategic and security doctrines and policies is essential for realizing the goal of complete elimination of nuclear weapons. Alignment of nuclear doctrines to a posture of 'no-first-use' and non-use against non-nuclear-weapon States by all nuclear weapon States will be an important step towards achieving this objective.

12. The non-nuclear weapon States have persistently sought legally-binding assurances from the nuclear-weapon States against the use or threat of use of nuclear-weapons against them. They have regarded the security assurances provided so far by the nuclear-weapon States as inadequate, conditional and non-binding. Legally-binding assurances on use or threat of use of nuclear weapons against non-nuclear weapon States would further reduce the nuclear danger and mitigate the sense of insecurity among non-nuclear weapon States and, thereby, strengthen the non-proliferation regime. India firmly supports a policy of 'no-first use' and non-use of nuclear weapons against non-nuclear weapon States. India is ready to join multilateral negotiations to enshrine its commitment to no-first-use and non-use of nuclear weapons against non-nuclear weapon States in legally binding agreements. An agreement among the States possessing nuclear weapons on a global 'no-first-use' posture will engender strategic stability and reduce the danger of the accidental or unintended use of nuclear weapons. 13. The international community succeeded in negotiating Conventions on total elimination of biological and chemical weapons mainly because their use had already been prohibited through the 1925 Geneva Protocol and States were prepared to relinquish these weapons as they did not foresee the likelihood of their use or their contribution to ensuring security. There is no reason why nuclear weapons cannot be eliminated in the same manner. A prohibition on the use or threat of use of nuclear weapons would be essential for eventual elimination of nuclear weapons.

14. The General Assembly resolution on a "Convention on the Prohibition of the use of Nuclear Weapons", first presented by India in 1982, requests the Conference on Disarmament to commence negotiations on an international convention prohibiting the use or threat of use of nuclear weapons under any circumstances. The resolution reflects India's belief that a multilateral, universal and binding agreement prohibiting the use or threat of use of nuclear weapons would help generate necessary political will among States possessing nuclear weapons to engage in negotiations leading to the total elimination of nuclear weapons; it would also contribute to mitigation of the nuclear threat in the interim, pending the complete elimination of nuclear weapons.

15. The General Assembly resolution on "Reducing Nuclear Danger" manifests India's conviction that the hair-trigger posture of nuclear forces carries the risk of unintentional, unauthorized or accidental use of nuclear weapons leading to a nuclear war with catastrophic consequences. The very real danger posed by the increased risk of systems and components falling into the hands of non-State actors or rogue actors within State structures, has further aggravated the existing dangers. Unilateral, bilateral and regional confidence-building measures, could supplement international agreements in reducing nuclear danger as also the risk of accidental nuclear war.

16. Progress towards the goal of nuclear disarmament will require a climate of mutual confidence in the international community to conclude universal non-discriminatory and verifiable prohibitions on nuclear weapons leading to their complete elimination. No effort must be spared in consensus building to this end.

17. We would urge the international community to intensify dialogue, so as to build a

consensus that strengthens the ability of the international community to initiate concrete steps towards achieving the goal of nuclear disarmament based on the following elements:

- Reaffirmation of the unequivocal commitment of all nuclear weapon States to the goal of complete elimination of nuclear weapons;
- Reduction of the salience of nuclear weapons in the security doctrines;
- Taking into account the global reach and menace of nuclear weapons, adoption of measures by nuclear-weapon States to reduce nuclear danger, including the risks of accidental nuclear war, de-alerting of nuclear-weapons to prevent unintentional and accidental use of nuclear weapons;
- Negotiation of a global agreement among nuclear weapon States on 'no-first-use' of nuclear-weapons;
- Negotiation of a universal and legally-binding agreement on non-use of nuclear weapons against non-nuclear weapon States;
- Negotiation of a Convention on the complete prohibition of the use or threat of use of nuclear weapons;
- Negotiation of a Nuclear Weapons Convention prohibiting the development, production, stockpiling and use of nuclear weapons and on their destruction, leading to the global, non-discriminatory and verifiable elimination of nuclear weapons with a specified timeframe.
